

SIMPLE OUTLINE FOR RESEARCH PLAN

CHAPTER ONE: GOAL, AIM, OBJECTIVES, AND RESEARCH QUESTIONS

- 1.1 Topic or Goal (one sentence)
- 1.2 Aim (one sentence)
- 1.3 Objectives (list minimum of three; maximum of five)
- 1.4 Research question(s)

CHAPTER TWO: METHODOLOGY

- 2.1 Setting: This states little description of *location, laboratory, facility, company, farm for the research*
- 2.2 Experimental Design: This states *what & what you want to construct, fuse together, separate from one another* to make happen the drama you want to show us.
- 2.3 Observation: What are the parameters/data/behavior that will *change or unchanged* as the drama occurs so we can know your dram is happening.

CHAPTER THREE: ANALYSIS

How will you show us that what *you planned* is what *you saw or did not see happen*; how will you explain any similarity/difference between your *expectation & results* to us that were present when you staged the drama?

CHAPTER FOUR: TIMELINE

When will you do all you want to doas the researcher? Outline major steps and their anticipated time of implementation. You can also show that in a table.
